

Updox KB

Creating an Updox Printer – Mac Version

1. Open a web browser and go to <http://myupdox.com/files/UpdoxPrinterSetup.zip> to download the Mac Printer application
2. Click on the downloaded file named “**Updox Printer Setup**” to unzip. Double-click to **Open with Archive**
3. Click on the unzipped file to begin installation
4. Set the name to **Updox Printer**
5. Open an item to print to Undox selecting the newly created Updox Printer and enter your ** Updox username and password (check box to save credentials to Keychain)

Practice Fusion users: In Updox, go to Menu, Profile. scroll down to view your Printer Credentials. If there are no values in the Printer Login and Printer Password fields, click the **Generate button to populate these fields. Use the Printer Login as your Username and Printer Password as your Password in Step 5.
