

How To Maximize Your Charge Captures

Learn how charge capture maximization optimizes practice revenue, increases billing speed, and boosts provider satisfaction, allowing you to focus on what matters most—your patients.

KNOW THE FACTS

Practices lose millions of their potential annual net revenue due to charge capture issues. Much of which will never be recovered.

(Financial Management Association)

A 2019 survey shows that 84 percent of practices rely in part on their EHR to capture charges but only 10% are happy with the results they are getting.

(Healthcare Finance News)

HOW WE HELP

Charge capture maximization requires the revenue cycle management team and providers to work closely together. All need access and visibility to data to quickly identify opportunities, seamlessly communicate and take action.

AUTOMATED DATA FEEDS

Using automated data feeds provide a real-time patient census and information about the care delivered by your practice's providers

AI ASSISTANCE

Advanced logic locates missing charges quickly and captures more billings with intelligent coding entry assistance.

EASY-TO-USE DASHBOARD

Easy-to-use dashboard allows your practice to view and manage workload to maximize charge capture

DID YOU KNOW?

Did you know providers and the RCM team can easily communicate and collaborate within the platform using our secure chat and messaging tools?

WORDS FROM CUSTOMERS

“I have used other charge and billing apps and in comparison Charge Capture is easy to use, takes less time to learn the application. This app reduced cumbersome paper processes and ease of reporting data is a definite plus!”
